

SHARKEY
PROCEDURES
QUALITY CONTROL &
DEFECTS
MANAGEMENT

Within our project completion strategy lays our focus on defect management. Over the course of the last few years we have made significant improvements in this aspect of delivery, through a continually recorded and maintained defects management process.

We aim to get each project right first time in order to avoid revisits to completed areas. We will strive for “sterility” to closed out areas not just in terms of fabric, but an “all inclusive” completion that allows for commissioning of building services systems.

We have learnt lessons from previous projects and listened to the comment of our clients and allocated design teams. As a business we are working hard at this area of delivery and completion.

Our award winning 7 point Defects Management Procedure is unique to Sharkey and we believe it offers a genuine competitive advantage within our marketplace. With confidentiality in mind we would prefer to share this knowledge on a 1-to-1 basis. If you would like to discuss this in more detail we'd be delighted to speak to you.
