World Headquarters, Edinburgh

PROJECT VALUE:

£12m (over 3 packages)

PROJECT DURATION

30 months (phased)

CONTRACT TYPE

Competitive

PROJECT DETAILS

Sharkey were appointed as a package contractor at the prestigious new global headquarters for The Royal Bank of Scotland.

Working alongside MACE, who acted as Construction Managers, Sharkey were entrusted with the interior fit out to the Executive Block, including bespoke manufacture of the board room furniture. As accommodation to RBS Executive and world wide visitors, quality of finish was of the highest priority.

Using 3D modelling package Autodes Inventor, the client was able to carry out virtual tours of rooms and see images of furniture prior to any works being done. Further mock ups were provided to allow final sign off and lead to the highest quality product and workmanship.

Sharkey were also appointed on the Business School and Conference Centre, peaking with a resource of over 90 men under our site management. Our responsibilities extended to all trades allocated with the interior fit out and included general joiner work, partitioning, glazed screens, ceilings, floor finishes and building services.

The 30 month project duration was a true test of Sharkey's capabilities and demonstrated our ability to deliver under the most demanding circumstances.
