VALUE
ADDING

VALUE ADDING

The Construction Lean Improvement Programme (CLIP) has been employed successfully on several Sharkey Projects. Using a collaborative approach to planning enables the reduction of waste (time and materials) and the improvement of all trades work coordination.

The CLIP process forms part of the "SMARTER APPROACH" perfect delivery model, which includes:

- Plan to protect - Risk Evaluation
- Pre Start Review
- Collaborative Forward Plan Review
- Collaborative Planning Session
- Weekly Planning Review
- Collaborative Weekly "Close Out Plan" Review

Sharkey promote the reduction of waste and the encourages recycling whenever possible. Sharkey is a registered carrier of controlled waste with the Scottish Environment Protection Agency (SEPA).

A proportion of any financial savings from such green measures will be reinvested into further green initiatives. Sharkey have existing frameworks in place to ensure that all recyclable material are correctly disposed off within the expectations of our environmental management system which is ISO 14001: 2004 accredited.

Within our Newhailes base, Sharkey have a number of recycling bins and waste containers where all refuse is separated and sorted in preparation for collection by Shanks Waste Solutions. It is then logged, transported and properly disposed of in an environmentally sound fashion.

Sharkey strive to source their raw materials from renewable resources whenever possible, including FSC Certified Timber and Pan European Certificates. The process of the company's acquisition of these materials is logged and recorded within the ISO14001 communication file. This data is audited on an annual basis in order for Sharkey to qualify for their environmental accreditation.
